

**DRAFT**

Motion to the Faculty Senate (1-2-24)

Background:

- The current *Faculty Manual* assumes employment with the University.
- With the sale of the clinical practice (SLUCare) many individual faculty who are part of the clinical practice are no longer employed by SLU.
- The rights and privileges of clinical faculty not employed by the University are not well described by the current *Faculty Manual*.
- Non-SLU employed individuals with faculty appointments within the SOM should have access to a manual that accurately describes their roles, responsibilities, protections, and privileges.
- The SOM's clinical faculty members support having a clinical faculty manual. [based on polling]

Therefore, the SOM's clinical faculty requests the Faculty Senate's approval to:

1. Create a separate, stand-alone clinical faculty manual that will accurately describe the rights and privileges of individuals not employed by the University who hold faculty appointments within the SOM.
2. Allow the SOM clinical faculty body in conjunction with the Dean of SOM, the Provost, the President of the University, and the Board of Trustees to describe a process to handle the development, approval, and future amendments to a SOM clinical faculty manual.
